Subject: RE: Request for Additional NAICS Codes

Tom:

Mick shared your email to him with me (see below). For clarification, I did not request that you add the NAICS code for dump trucking to this firm's certification status. I pointed out to you that the firm's business description did not match its NAICS code index entry for NAICS 484220. I did ask you to reconcile the firm's business description which said "dump trucking" with its NAICS index entry which was for "dump trucking - Trucking, specialized freight (except used goods), local." I did ask you to contact the firm's owner, determine its capability to perform the work scope, whether it had the necessary resources, etc. so you could determine whether the NAICS code index entry: "Dump trucking (e.g., gravel, sand, top soil)" would be appropriate for the firm. Although we didn't discuss, did you consider whether the 484220 NAICS code index entry "Gravel hauling, local" was appropriate? You, as the analyst assigned to handle this file, are solely responsible for conducting a complete review and thereafter making a recommendation to your supervisor concerning any NAICS codes changes or certification status determinations.

Please adjust all file records and notes, as may be necessary, in accordance with the above.

Thank you.
